

MOHAMMAD CHAND

Backend Developer | PHP · Laravel · CodeIgniter · Magento 2 · Node.js
+91 97790 24981 · mohammadchand.cks@gmail.com · Chamkaur Sahib, Punjab, India

PROFESSIONAL SUMMARY

Backend Developer with 6+ years of experience building scalable web applications and RESTful APIs. Proficient in PHP, Laravel, CodeIgniter (CI1 & CI4), and Magento 2, with strong expertise in custom module development, legacy system migration, and headless e-commerce via Magento 2 GraphQL. Experienced in Node.js/Express for backend API services, with hands-on skills in MySQL, PostgreSQL, Redis, AWS S3, Docker, and Nginx. Consistently delivers secure, maintainable, and high-performance backend solutions across diverse industries.

TECHNICAL SKILLS

Languages: PHP 8.x, JavaScript (ES6+), SQL, HTML5, CSS3

Backend Frameworks: Laravel, CodeIgniter (CI1 & CI4), Node.js, Express.js

E-commerce & CMS: Magento 2, WordPress, Shopify

Databases: MySQL, PostgreSQL, Redis

Cloud & DevOps: AWS S3, Docker, Nginx, PM2, Linux (Ubuntu)

APIs & Security: RESTful API Design, Magento 2 GraphQL, Headless Commerce, AES-256-GCM Encryption

Tools: Git, Composer, npm, Bitbucket, Jira

WORK EXPERIENCE

Backend Developer | VAYUZ Technologies

Feb 2025 – June 2026 · Noida, India (Remote)

- Migrated legacy CodeIgniter 1 applications to CodeIgniter 4, modernizing routing, namespace architecture, and database query layers to improve performance and long-term maintainability.
- Designed and developed RESTful APIs in CodeIgniter 4 for multiple product modules, enabling seamless frontend and third-party service integrations.
- Built and maintained scalable Node.js/Express APIs deployed via PM2 on Nginx, supporting high-concurrency backend services.
- Implemented AES-256-GCM end-to-end API encryption layer, replacing a broken RSA hybrid system and securing all client-server data in transit.
- Collaborated with cross-functional teams to enhance backend architecture, enforce code quality standards, and improve overall delivery workflows.
- Conducted code reviews and provided technical guidance to junior developers, contributing to cleaner codebases and reduced bug count.

PHP Backend Developer | Freelance

Feb 2021 – Jan 2025 · Remote

- Designed and built custom Magento 2 modules and themes, extending core e-commerce functionality for clients across retail, wholesale, and B2B verticals.
- Extended Magento 2 GraphQL APIs to support headless frontend integrations, enabling flexible and performant decoupled storefront architectures.
- Developed a queue-based batch processing system in PHP for bulk Magento 2 product price updates, eliminating admin panel freezes when managing large SKU volumes via scheduled cron jobs.

- Architected multilingual, multi-country websites in CodeIgniter 4 supporting 5+ languages, enabling clients to expand reach across international markets.
- Delivered RESTful API backends in Laravel covering user authentication, role-based access control, product management, and reporting modules.
- Built and maintained dynamic PHP applications using CodeIgniter, Laravel, and WordPress across multiple long-term client projects.
- Implemented secure user authentication systems using JWT and session-based mechanisms across Laravel and CodeIgniter applications.
- Managed MySQL and PostgreSQL database schemas, writing optimized queries, stored procedures, and handling data migrations across projects.

Web Developer | CMSolutionz

Mar 2019 – Jan 2021 · Mohali, Punjab

- Developed and deployed 10+ responsive, cross-browser-compatible websites using WordPress and Shopify for clients across multiple industries.
- Collaborated with UI/UX designers using Adobe XD to translate design mockups into pixel-perfect, mobile-first website implementations.
- Integrated and customized plugins including Elementor, WooCommerce, and Mailchimp to enhance e-commerce functionality and marketing automation.
- Optimized website performance by auditing and reducing plugin overhead, resulting in improved page load speeds and stronger SEO rankings.
- Troubleshooted and resolved client-reported technical issues, ensuring reliable website functionality and minimizing downtime.

EDUCATION

BCA – Computer Programming & Applications

Punjabi University, Patiala · 2015 – 2018

Training in Web Development

Web Technology Institute · Sep 2018 – Mar 2019 · PHP, MySQL, JavaScript, HTML5, CSS3, Bootstrap
